

NOUR AHMED IBRAHIM

Junior .NET Backend Developer | ASP.NET Core | REST APIs

Assiut, Egypt | +20 1101943883 | nouryahmed607@gmail.com | linkedin.com/in/nour-ahmed-8a4046257

Professional Summary

Junior .NET Backend Developer with hands-on experience building scalable RESTful APIs using ASP.NET Core. Skilled in Clean Architecture, Entity Framework Core, SQL, authentication systems, and backend architecture patterns. Experienced in developing modular backend systems and collaborating on full-stack projects to deliver secure and maintainable software.

Experience

Route Academy

ASP.NET Trainee

Egypt

2023 – Present

- Completed intensive backend training covering ASP.NET Core, MVC, Web API, database design, and design patterns.
- Built multiple real-world projects using ASP.NET Core MVC and RESTful APIs.
- Applied Clean Architecture, SOLID principles, Repository Pattern, and Unit of Work to improve maintainability.
- Integrated Entity Framework Core with SQL Server for data persistence and database management.

ICPC Trainee

Competitive Programmer

Egypt

2022 – 2024

- Solved 100+ algorithmic problems using C++ with focus on analytical thinking and problem solving.
- Strengthened knowledge of data structures, algorithms, and competitive programming techniques.
- Analyzed time and space complexity to optimize code performance.

Projects

7wshly — Graduation Project | Flutter, Django REST Framework, PostgreSQL, JWT

- Developed a budgeting and personal finance app that helps users create weekly or monthly plans based on income, expenses, and savings goals.
- Built secure REST APIs for authentication, profile management, budget planning, and financial tracking using Django REST Framework and JWT.
- Implemented rule-based plan recommendations, savings suggestions, spending analysis, offers suggestions, and market-price tracking for smarter financial decisions.

E-Commerce Web API | ASP.NET Core Web API

- Built a modular RESTful API with core modules for products, orders, basket, authentication, and payments.
- Secured APIs using JWT authentication and ASP.NET Identity with Entity Framework Core and SQL Server.
- Applied Onion Architecture, Repository Pattern, Unit of Work, and Dependency Injection for clean and scalable backend design.

Gym Management System | ASP.NET Core MVC

- Developed a web-based system to manage members, trainers, sessions, and memberships using ASP.NET Core MVC.
- Implemented full CRUD operations with three-layer architecture, Repository Pattern, and Unit of Work.

- Integrated Entity Framework Core, SQL Server, ASP.NET Core Identity, Razor Views, and Bootstrap.

Student Complaint Management Platform | Flask, React, PostgreSQL, Docker

- Collaborated in a team to build a full-stack complaint management platform for students and administrators.
- Developed RESTful APIs for authentication, complaint submission, tracking, replies, and admin workflows.
- Implemented PostgreSQL database design, protected React routes, role-based access control, and Dockerized development setup.

Education

Bachelor of Science in Computer Science

Faculty of Science, Assiut University

2022 – 2026

Assiut, Egypt

Technical Skills

Programming Languages: C#, C++, Java, JavaScript, Python

Backend Development: ASP.NET Core, ASP.NET Core MVC, ASP.NET Core Web API, RESTful APIs, JWT, ASP.NET Identity, Dependency Injection, LINQ

Database Systems: SQL Server, PostgreSQL, Database Design

ORM & Data Access: Entity Framework Core, Dapper, Repository Pattern, Unit of Work

Architecture & Concepts: OOP, Data Structures, Algorithms, Clean Architecture, Onion Architecture, Three-Layer Architecture, SOLID Principles, Design Patterns

Tools & Technologies: Git, GitHub, Docker Basic, AutoMapper, Swagger, Postman, Unit Testing

Frontend Basics: HTML, CSS, Bootstrap, Razor Views

Soft Skills

Problem Solving | Analytical Thinking | Team Collaboration | Communication | Time Management
